

Ethical Evolution or devolution? We have a choice!

Double-sided centerfold as a supplement to the manifestoasbooklet.pdf of the **Dharma-Ethicparty**:

The Centralized Learned Decentralism

A confidential map and a organizational, political diagram on our new system of education

©: www.ethicparty.org - Revised on March 27 2011

Too large political units lead to anonymity and corruption: Globalization = economic dependence and centralised dictatorship = loss of freedom and personal responsibility = an apathetic, ethical devolution of mankind ... "The perfect unit of self-government is a familiar environment in which, as Aristotle would say, people can know one another's character. In villages, townships or communes, autonomy reproduces the advantages of direct democracy." (Dr. Beni Prasad).

Violence leads to centralization - decentralization to none-violence! On this map of Europe you see that the author has divided many countries by cultural factors, but not Switzerland which actually has many languages. This is better understandable when you realize that Switzerland has its own culture, namely that of the **directly-democratic Confederation**, which we see as a model case, or, as an approximation to the Gandhian thoughts of democracy. If you look at a map of Switzerland, we see a similar division in politically largely independent cantons and municipalities. See also our **Manifesto of the Dharma – Ethic Party** on our website, where we talk more on this model character of Switzerland.

Map from the book "Das Ende der Grossen – Zurück zum menschlichen Mass" by Leopold Kohr, Otto Müller Verlag. Another book on this subject: "Small is Beautiful – die Rückkehr zum menschlichen Mass" Von Ernst Friedrich Schumacher – C.F. Müller Verlag

Our organizational, political diagram of the **Manifesto of the Dharma-Ethicparty:**

A new education system for freedom and ethical evolution

We will reach the global spread of the Gandhian idea of decentralized, direct democracy through a hierarchical organized educational system that prevents the corruption of journalism and science, etc.

The **Ethic Party** is for the establishment of independent and responsible individuals, families, communities, cantons, provinces, and nations as we have illustrated on this page.

Direct democratically and decentralized structure for the promotion of personal responsibility and ethical evolution:

1.

Individuals

Each individual has the opportunity to find by a fair selection process its way into the Castalian Province (see right column) if it has the right ethical, intellectual and spiritual qualities ...

2.

Families

Consisting of all age groups (that is favourable to the ethical evolution of the individual)

3.

Villages, towns and cities with neighbourhoods-districts of max. 500

With its own primary schools, own decentralized social services, its own economic structures and with its own direct-democratic administration, which supports non-functioning families and individuals.

4.

County and city districts

With the secondary schools, own court system and with a direct-democratic administration, which supports non-functioning neighbourhoods-districts.

5.

Cantonal districts / provinces

To universities in their own court system, and a direct-democratic administration, which supports non-functioning county and city districts.

6.

Nations

Democratically established according to cultural or religious factors with a direct-democratic administration, which supports non-functioning cantonal districts / provinces (see the suggested retail maps on the previous page).

7.

Cultures

Subdivided into the cultures of the world with direct-democratic administration, which supports non-functioning nations.

8.

The new UN

The primary direct-democratic body. Coordinates the concerns of cultural areas and nations, and controls the fair

distribution of natural resources and raw materials of the earth (see the party program of **Ethic Party**).

9. The Castalian Province: Hierarchically organized education system with an independent and corruption-free body of knowledge and research (the truth is one):

According to Hermann Hesse's Nobel-praised book "The Glass Bead Game". The **Castalian Province** includes about 5% of the population. It provides the teachers, scientists and political advisors. Founding a **family** means for the **Castalians** the honourable discharge or pausing from the ranks of the Castalian Province, since now for educating the children an economic activity has become necessary and a economic / intellectual corruption is likely. A description of this education system is in the **Manifesto of the Ethic Party** on our website at: Conscious science / The study guide for the glass bead game (at ethikpartei.ch, .de & ethicparty.org).

The **Castalian Province** supervises the primary schools and searches there for suitable members for their own ranks, membership into the Castalian schools of the corruption-free, ethically educated is offered somewhat later. The Castalian province monitors at this stage also the equitable provision of microcredit and the functioning of a greatest possible economic and political independence of the neighborhood districts.

The **Castalian Province** supervises at this stage, the media and secondary schools and recruits from them the appropriate mentally qualified members for their own ranks of the ethically educated. Confidential

The **Castalian Province** supervises at this level, the universities, the media and the scientific research and industrial applications.

The **Castalian Province** supervises at this stage, the media, the scientific research and industrial application, the money supply (printing press) into society and prevents the emergence of anti-democratic power monopolies, large industry powers and secret societies that try to corrupt and undermine the banking system, the mass media, the economy or the political system.

The **Castalian Province** prevents at this stage the emergence of racial power-monopolies and economic-industrial cartels and it oversees the international scientific research projects.

The supreme authority of the Castalian Province, which oversees the UN. It teaches in all cultures of the

world the Gandhian thoughts of decentralized and direct democracy and if they are danger it calls the local or the world population to a non-violent non-cooperation.
